6. Toxicity to non-target Insects (honey bees) (If the registered pesticide was applied indoors or other tactics may be identified as low risk concern to activity of honeybees. The data are non-required.)

6.1 Requirement for registering in the field condition:

- (1).Data of acute contact toxicity (Basal requirement for new registering pesticide.) of Technical-Grade pesticide against honey bees (LD₅₀, µg/bee) (ACH) :
-
- (2) Data of acute oral toxicity of (Basal requirement for new registering pesticide.) Technical Grade pesticide against honey bees (LD₅₀, µg/bee)(AOH) :
-
- (3) Data of acute contact toxicity (Required if the target crops were the nectar or pollen of formulated pesticide plants.) against honeybees (LD₅₀, µg/bee)(ACH) :
- (Optional)
-
- (4) Reports of semi-field or field trial study of bee colony: (Optional) If the risk quotient (RQ, the ratio of ACH of formulated pesticide or AOH of technical grade pesticide to gram active ingredient per hectare) was equal to or more than 50, the data of semi-field or field trial study of bee colony is required.
-

(5) Acute oral toxicity of formulated pesticide against larval bees (LD₅₀, µg/bee): (Optional)

(If the active ingredient had other sub-lethal effects to honey bees such as side effect on the development of reproduction or growth regulator etc., data of acute oral toxicity of larval bees are required.)
